Lab 2 GDB

Ildar Kamaletdinov – team lead, Open Mobile Platform

with Dmitrii Alekhin – junior software developer as TA

TASK

- › Learn these utilities: GDB, strace, GHIDRA, ldd.
- › `Hack` the application provided by the instructor!
- › Application requires the license that is generated based on your hardware id.
- › License will be stored somewhere on your PC (filesystem).

- › Implement 2 artifacts:
 - › 1. Create keygen for this app.
 - › 2. Create binary patch to disable licensing completely.

- › Graded output: 2 artifacts with source code and report including screenshots. (in PDF)

Acceptance criteria

- › A (20 points) – both artifacts were implemented and report provided.
- › B (15-19 points) – only binary patch was implemented and report provided.
- › C (10-14 points) – only keygen was implemented and report provided.
